***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Matouka et al. (5,170,676).

Matouka et al. shows the claimed invention where a gear (figure 8) has an outer gear portion (109) which has gear teeth about the periphery for engagement with another gear; the outer gear portion has an inner surface which has a spring (111) which frictionally engages the inner surface of the outer gear portion; the inner gear portion (94) supports the spring for frictional driving engagement with the outer gear portion to transmit torque; the frictional engagement will provide an overload release function whether the power is flowing from the inner gear portion out to the outer gear portion or reversed.
